

1. Record Nr.	UNINA9910962648703321
Autore	Taylor Peter C (Peter Clement)
Titolo	Curing concrete / / Peter C. Taylor
Pubbl/distr/stampa	Boca Raton [Fla.] : Taylor & Francis, 2014
ISBN	1-135-23521-X 0-429-20665-8 1-62870-782-8 0-415-77952-9
Edizione	[1st ed.]
Descrizione fisica	1 online resource (214 p.)
Disciplina	620.1/36
Soggetti	Concrete - Curing Concrete construction
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"A CRC title."
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Front Cover; Contents; List of figures; List of tables; Preface; Acknowledgments; About the author; Chapter 1 - Introduction; Chapter 2 - Cementitious materials: Chemistry and hydration; Chapter 3 - Benefits of curing on concrete performance; Chapter 4 - Curing in practice; Chapter 5 - Measurement and specifications; Chapter 6 - Real-world experience; Back Cover
Sommario/riassunto	Curing is one of those activities that every civil engineer and construction worker has heard of, but in reality does not worry about much. In practice, curing is often low on the list of priorities on the construction site, particularly when budgets and timelines are under pressure. Yet the increasing demands being placed on concrete mixtures also mean that they are less forgiving than in the past. Therefore, any activity that will help improve hydration and so performance, while reducing the risk of cracking, is becoming more important. Curing Concrete explains exactly why curing is so impor
