Edizione	[1st ed.]
Descrizione fisica	xv, 189 p
Classificazione	PSY006000PSY036000
Altri autori (Persone)	SternbergJanine UrwinCathy
Disciplina	155.42/2820723
Soggetti	Infant psychology Psychoanalysis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Introduction to part I -- pt. 2. Introduction to part II -- pt. 3. Introduction to part III.
Sommario/riassunto	"Psychoanalytic infant observation is frequently used in training psychoanalytic psychotherapists and allied professionals, but increasingly its value as a research method is being recognised, particularly in understanding developmental processes in vulnerable individuals and groups. This book explores how infant observation can be used as a research methodology and discusses the strengths and limitations from a methodological and philosophical point of view. Infant Observation and Research uses detailed case studies to demonstrate the potential of infant observation as a research method. Divided into three sections this book covers:Infant observation as part of the learning processHow infant observation can inform understanding and influence practicePsychoanalytic infant observation and other methodologies.Throughout the book, Cathy Urwin, Janine Sternberg, and their contributors introduce the reader to the nature, scope and value of psychoanalytic infant observation. This book will

therefore interest a range of mental health practitioners concerned with early development and infants' emotional relationships, as well as academics and researchers in the social sciences and humanities"--
