

1. Record Nr.	UNINA9910962849703321
Autore	Merry Alan
Titolo	Errors, medicine, and the law / / Alan Merry and Alexander McCall Smith
Pubbl/distr/stampa	Cambridge : , : Cambridge University Press, , 2001
ISBN	0-511-80606-X 0-511-15353-8 0-511-01630-1
Edizione	[1st ed.]
Descrizione fisica	1 online resource (vi, 254 pages) : digital, PDF file(s)
Disciplina	344/.0411
Soggetti	Medical personnel - Malpractice Medical jurisprudence
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	1. Accidents -- 2. The human factor -- 3. Errors -- 4. Violations -- 5. Negligence, recklessness and blame -- 6. The standard of care -- 7. Assessing the standard -- the role of the expert witness -- 8. Beyond blame: responding to the needs of the injured.
Sommario/riassunto	Untoward injuries are unacceptably common in medical treatment, at times with tragic consequences for patients. The phrases 'an epidemic of error' and 'the medical toll' have been coined to describe this problem of 'iatrogenic harm', which it has been suggested may have contributed to 98,000 deaths per year in the US. Some of these incidents are the result of negligence on the part of doctors, but more usually they are no more than inevitable concomitants of the complexity of modern healthcare. This book is fundamentally about distinguishing the former from the latter. Although medicine is used as the book's primary example, the points made apply equally to aviation, industrial activities, and many other fields of human endeavour. The book advocates a more informed alternative to the blaming culture which has increasingly come to dominate our response to accidents, whether in the medical field or elsewhere.
