Sommario/riassunto	Über das Medium Computerspiel findet zunehmende eine Auseinandersetzung mit psychologischen Traumata statt. Posttraumatische Belastungsstörung, Krankheit und Tod sowie Depressionen und Phobien sind hierbei vorherrschende Themen und Motive. Thomas Spies zeigt in einem historischen Überblick und vergleichenden Analysen Tendenzen der kulturellen Repräsentation auf. Die Beschäftigung mit Titeln wie »Papers, Please«, »Hellblade: Senua's Sacrifice« und »Disco Elysium« lässt deutlich werden, wie Computerspiele zunehmend medienspezifische Möglichkeiten finden, die Vielfalt und Komplexität traumatischer Erfahrungen zu vermitteln.

Sommario/riassunto

Extending Griffiths' classical theory of period mappings for compact Kähler manifolds, this book develops and applies a theory of period mappings of "Hodge-de Rham type" for families of open complex manifolds. The text consists of three parts. The first part develops the theory. The second part investigates the degeneration behavior of the relative Frölicher spectral sequence associated to a submersive morphism of complex manifolds. The third part applies the preceding material to the study of irreducible symplectic complex spaces. The latter notion generalizes the idea of an irreducible symplectic manifold, dubbed an irreducible hyperkähler manifold in differential geometry, to possibly singular spaces. The three parts of the work are of independent interest, but intertwine nicely.

Community and systems approach -- Addressing the incel through the bit/care mode.

Sommario/riassunto

"Understanding and Treating Incels is an indispensable guide for professionals who want to better understand the involuntary celibate movement, assess individuals' potential for violence, and offer treatment approaches and prevention efforts"--
