Autore	Marciak-Kozowska Janina
Titolo	From femto- to attoscience and beyond / / Janina Marciak-Kozłowska and Mirosław Kozłowski
Pubbl/distr/stampa	New York, : Nova Science Publishers, Inc., c2009
ISBN	1-61728-670-2
Edizione	[1st ed.]
Descrizione fisica	1 online resource (202 p.)
Collana	Lasers and electro-optics research and technology series
Altri autori (Persone)	KozowskiMirosław <1937->
Disciplina	621.36/6
Soggetti	Laser pulses, Ultrashort Rydberg states Transport theory - Mathematics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.

Sommario/riassunto

Developments in optical pulse engineering over the last 20 years lead to the generation of laser pulses as short as few femtosecond, providing a unique tool for high resolution time domain spectroscopy. In this book the interaction of the attosecond laser pulses with matter is investigated.
