

1. Record Nr.	UNINA9910963214903321
Autore	Davies N. B (Nicholas B.), <1952->
Titolo	An introduction to behavioural ecology / / Nicholas B. Davies, John R. Krebs, Stuart A. West
Pubbl/distr/stampa	Hoboken, : John Wiley & Sons, 2012
ISBN	9786613616005 9781444398465 1444398466 9781280586170 1280586176 9781444398458 1444398458
Edizione	[4th ed.]
Descrizione fisica	1 online resource (522 p.)
Altri autori (Persone)	KrebsJ. R (John R.) WestStuart A
Disciplina	591.51
Soggetti	Animal behavior - Evolution Animal ecology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	An Introduction to Behavioural Ecology; Contents; Preface; Acknowledgements; 1 Natural Selection, Ecology and Behaviour; Watching and wondering; Natural selection; Genes and behaviour; Selfish individuals or group advantage?; Phenotypic plasticity: climate change and breeding times; Behaviour, ecology and evolution; Summary; Further reading; Topics for discussion; 2 Testing Hypotheses in Behavioural Ecology; The comparative approach; Breeding behaviour of gulls in relation to predation risk; Social organization of weaver birds; Social organization in African ungulates Limitations of early comparative studiesComparative approach to primate ecology and behaviour; Using phylogenies in comparative analysis; The comparative approach reviewed; Experimental studies of adaptation; Summary; Further reading; Topics for discussion; 3 Economic Decisions and the Individual; The economics of carrying a load; The economics of prey choice; Sampling and information; The risk

of starvation; Environmental variability, body reserves and food storing; Food storing birds: from behavioural ecology to neuroscience; The evolution of cognition; Feeding and danger: a trade-off; Social learning; Optimality models and behaviour: an overview; Summary; Further reading; Topics for discussion; 4 Predators versus Prey: Evolutionary Arms Races; Red Queen evolution; Predators versus cryptic prey; Enhancing camouflage; Warning colouration: aposematism; Mimicry; Trade-offs in prey defences; Cuckoos versus hosts; Summary; Further reading; Topics for discussion; 5 Competing for Resources; The Hawk-Dove game; Competition by exploitation: the ideal free distribution; Competition by resource defence: the despotic distribution; The ideal free distribution with unequal competitors; The economics of resource defence; Producers and scroungers; Alternative mating strategies and tactics; ESS thinking; Animal personalities; Summary; Further reading; Topics for discussion; 6 Living in Groups; How grouping can reduce predation; How grouping can improve foraging; Evolution of group living: shoaling in guppies; Group size and skew; Group decision making; Summary; Further reading; Topics for discussion; 7 Sexual Selection, Sperm Competition and Sexual Conflict; Males and females; Parental investment and sexual competition; Why do females invest more in offspring care than do males? Evidence for sexual selection; Why are females choosy?; Genetic benefits from female choice: two hypotheses; Testing the hypotheses for genetic benefits; Sexual selection in females and male choice; Sex differences in competition; Sperm competition; Constraints on mate choice and extra-pair matings; Sexual conflict; Sexual conflict: who wins?; Chase-away sexual selection; Summary; Further reading; Topics for discussion; 8 Parental Care and Family Conflicts; Evolution of parental care; Parental investment: a parent's optimum; Varying care in relation to costs and benefits; Sexual conflict; Sibling rivalry and parent-offspring conflict: theory

Sommario/riassunto

Additional resources for this book can be found at: www.wiley.com/go/davies/behaviouralecology This textbook helped to define the field of Behavioural Ecology. In this fourth edition the text has been completely revised, with new chapters and many new illustrations and full colour photographs. The theme, once again, is the influence of natural selection on behaviour - an animal's struggle to survive and reproduce by exploiting and competing for resources, avoiding predators, selecting mates and caring for offspri

Sommario/riassunto	Public interest in religious institutions and 'religious' phenomena in Italy has been on the rise, with the surge of debates and studies regarding religion and national identity, religion and its historical role, and religion and civil values. In Catholicism in Italy in the Age of Pluralism, Franco Garelli presents an interesting perspective and analysis of the controversial and ambivalent dynamics that characterize the dialogue on religion and politics within Italy today.
