Bell -- Training librarians for the future : integrating technology into

LIS education / Meredith G. Farkas -- Technophobia, technostress, and technorealism / Jessamyn West -- Reading tea leaves : one past, many futures / Alane Wilson.

---

Sommario/riassunto

In *Information Tomorrow*, Gordon brings together 20 of today's leading thinkers on the intersections between libraries and technology. They address various ways in which new technologies influence librarians' actions and goals and offer ideas for using technology to meet patrons where they are. The result is an engaging, wide-ranging, and sometimes provocative discussion for systems librarians, library IT workers, library managers and administrators, and anyone working with or interested in technology in libraries.
