

1. Record Nr.	UNINA9910963354003321
Titolo	Broca's region // edited by Yosef Grodzinsky, Katrin Amunts
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, 2006
ISBN	0-19-029223-7 0-19-803952-2 1-280-84505-8 1-4294-3871-1
Edizione	[1st ed.]
Descrizione fisica	1 Online-Resource (xv, 419 pages, [16] pages of plates) : illustrations (some color.)
Altri autori (Persone)	GrodzinskyYosef AmuntsKatrin
Disciplina	612.8/2336
Soggetti	Broca's area Neurolinguistics Psycholinguistics Frontal lobes Sign language Aphasia Broca Area Aphasia, Broca Frontal Lobe Sign Language
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Contents; Contributors; Introduction; I. Matters Anatomical; 1. The Origin of Broca's Area and Its Connections from an Ancestral Working Memory Network ; 2. A Multimodal Analysis of Structure and Function in Broca's Region ; 3. Broca's Area in the Human and the Nonhuman Primate Brain ; II. Matters Linguistic; 4. Weak Syntax; 5. Speech Production in Broca's Agrammatic Aphasia: Syntactic Tree Pruning; 6. A Blueprint for a Brain Map of Syntax; 7. Evaluating Deficit Patterns of Broca's Aphasics in the Presence of High Intersubject Variability; 8. Treating Language Deficits in Broca's Aphasia

III. Motor Aspects and Sign Language9. Broca's Region: A Speech Area?;
 10. Broca's Area in System Perspective: Language in the Context of
 Action-Oriented Perception ; 11. The Role of Broca's Area in Sign
 Language ; IV. Psycholinguistic Investigations; 12. Broca's Area and
 Lexical-Semantic Processing; 13. The Neural Basis of Sentence
 Processing: Inferior Frontal and Temporal Contributions; 14.
 Involvement of the Left and Right Frontal Operculum in Speech and
 Nonspeech Perception and Production ; 15. On Broca, Brain, and
 Binding
 16. A Role for Broca's Area Beyond Language Processing: Evidence from
 Neuropsychology and fMRIV. Discussion; 17. Julich Workshop Excerpts;
 VI. Historical Articles: Choices We Made: An Introduction to the
 Historical Section; 18. Comments Regarding the Seat of the Faculty of
 Spoken Language, Followed by an Observation of Aphemia (Loss of
 Speech) (1861); 19. On Affections of Speech from Disease of the Brain
 (1878-1879); 20. On Aphasia (1885); 21. Contributions to a
 Histological Localization of the Cerebral Cortex-VI. Communication:
 The Division of the Human Cortex (1908)
 22. The Agrammatical Language Disturbance: Studies on a
 Psychological Basis for the Teaching on Aphasia (1913)23. The
 Cytoarchitectonics of the Fields Constituting Broca's Area (1931); 24.
 The Phonological Development of Child Language and Aphasia as a
 Linguistic Problem (1956); 25. Grammatical Complexity and Aphasic
 Speech (1958); 26. The Organization of Language and the Brain (1970);
 27. Broca's Area and Broca's Aphasia (1976); Author Index; A; B; C; D;
 E; F; G; H; I; J; K; L; M; N; O; P; Q; R; S; T; U; V; W; X; Y; Z; Subject Index;
 A; B; C; D; E; F; G; H; I; L; M; N; O; P; Q; R; S; T; U; V

Sommario/riassunto

Paul Broca, the discoverer of Broca's region, was one of the first
 scientists to equate a significant piece of behaviour - articulated
 language - with a piece of neural tissue. This text creates a coherent,
 novel picture of the state of contemporary knowledge on the structure
 and function of the region.
