Sommario/riassunto

Universities have been propelled into the center of the global political economy of knowledge production by a number of factors: mass education, academic capitalism, the globalization of knowledge, the democratization of communication in the era of the Internet, and the emergence of the knowledge and innovation economy. The latest book in the International Studies in Higher Education series, *Universities and the Public Sphere* addresses the vital role of research universities as global public spheres, sites where public interaction, conversation and deliberation take place, where th
