Autore	Rossi Carlos A. <1960->
Titolo	The completion of the oil era : the economic impact / / Carlos A. Rossi
Pubbl/distr/stampa	New York, : Nova Science Publishers, c2010
ISBN	1-61122-348-2
Edizione	[1st ed.]
Descrizione fisica	1 online resource (255 p.)
Collana	Energy policies, politics and prices series.
Disciplina	338.2/7282
Soggetti	Petroleum engineering - Economic aspects Petroleum industry and trade - Government policy Renewable energy sources Petroleum reserves Technology and civilization Energy policy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Partly a translation of the 2007 work El epilogo del petroleo with additional chapters and new updated information.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The determining factor of our century -- The end of the petroleum civilization? -- Alternative energy -- The bridge : the nonconventional reserves -- The economists' challenge -- An oil plan -- Strategy and conclusions -- The case for economic cooperation.
Sommario/riassunto	This work investigates how much oil is left in the world in quantitative and qualitative terms. It then examines all of the different alternate energy sources, finds out their different development stages and informs economists so that they can calculate how long scientists have to develop sustainable alternate energy sources.
