Sommario/riassunto	Personality Development is a comprehensive overview of infant observation and personality development. It starts at inter-utero life

and goes through to adulthood, focusing on the emotional tasks involved at each stage of development and the interplay of internal processes and external circumstances. Contents include: * intra-uterine life and the experience of birth * babyhood: becoming a person in the family * the toddler and the wider world * the latency period. Using clinical and observational material, it will be of interest to those teaching personality de
