Sommario/riassunto

As organizations and leadership become more global, there are pressing needs for better developed conceptual models and definitions of what is meant by global leadership. Further, there is a need to integrate models and empirical evidence from multiple cultures and from non-Western authors. This series will be of value to: academics doing research and teaching on subjects related to leadership, international business, organizational behavior, and international management; practitioners and consultants who are managing global leadership development processes; and to individuals engaged in global leadership.
