

1. Record Nr.	UNIORUON00019676
Autore	TSANG, O.Z.
Titolo	A Complete Chinese-English Dictionary / O.Z. Tsang
Pubbl/distr/stampa	4a. ed
Descrizione fisica	Shanghai : The Republican Press, 1922 paginaz. varia ; 25 cm
Classificazione	CIN II A
Soggetti	Lingua cinese - Dizionari
Lingua di pubblicazione	Molteplice
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNINA9910963676103321
Titolo	Engineering in K-12 education : understanding the status and improving the prospects / / Linda Katehi, Greg Pearson, and Michael Feder, editors ; National Academy of Engineering and National Research of the National Academies
Pubbl/distr/stampa	Washington, D.C., : National Academies Press, c2009
ISBN	9786613376091 9780309144711 030914471X 9781283376099 1283376091 9780309137799 0309137799
Edizione	[1st ed.]
Descrizione fisica	1 online resource (595 p.)
Altri autori (Persone)	KatehiLinda PearsonGreg FederMichael A. <1977->
Disciplina	620.0071
Soggetti	Engineering - Study and teaching (Elementary) - United States Engineering - Study and teaching (Secondary) - United States
Lingua di pubblicazione	Inglese

Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"National Academy of Engineering and National Research Council of the National Academies."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	""Front Matter""; ""Preface""; ""Acknowledgments""; ""Contents""; ""List of Acronyms""; ""Summary""; ""1 Introduction""; ""2 What Is Engineering?""; ""3 The Case for K-12 Engineering Education""; ""4 The Current State of K-12 Engineering Education""; ""5 Teaching and Learning Core Engineering Concepts and Skills in Grades K-12""; ""6 Findings and Recommendations""; ""Appendix A: Committee Biographies""; ""Appendix B: Curriculum Projects Descriptive Summaries""; ""Appendix C: Curriculum Projects Detailed Analyses""; ""Index""
Sommario/riassunto	<p>Engineering education in K-12 classrooms is a small but growing phenomenon that may have implications for engineering and also for the other STEM subjects--science, technology, and mathematics. Specifically, engineering education may improve student learning and achievement in science and mathematics, increase awareness of engineering and the work of engineers, boost youth interest in pursuing engineering as a career, and increase the technological literacy of all students. The teaching of STEM subjects in U.S. schools must be improved in order to retain U.S. competitiveness in the global economy and to develop a workforce with the knowledge and skills to address technical and technological issues. Engineering in K-12 Education reviews the scope and impact of engineering education today and makes several recommendations to address curriculum, policy, and funding issues. The book also analyzes a number of K-12 engineering curricula in depth and discusses what is known from the cognitive sciences about how children learn engineering-related concepts and skills. Engineering in K-12 Education will serve as a reference for science, technology, engineering, and math educators, policy makers, employers, and others concerned about the development of the country's technical workforce. The book will also prove useful to educational researchers, cognitive scientists, advocates for greater public understanding of engineering, and those working to boost technological and scientific literacy.</p>
