Titolo	Geochemistry of non-traditional stable isotopes / / editors, Clark M. Johnson, Brian L. Beard, Francis Albarede
Pubbl/distr/stampa	Washington, D.C. : , : Mineralogical Society of America St. Louis, Mo. : , : Geochemical Society, , 2004
ISBN	1-5015-0936-5
Descrizione fisica	1 online resource (xv, 454 pages) : illustrations, maps
Collana	Reviews in Mineralogy and Geochemistry ; ; Volume 55
Disciplina	551.9
Soggetti	Isotopes Geochemistry Stable isotopes Isotope geology Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"The review chapters in this volume were the basis for a two-day short course on non-traditional stable isotopes held prior (May 15-16, 2004) to the spring AGU/CGU Meeting in Montreal, Canada"--P. v.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Overview and general concepts / Clark M. Johnson, Brian L. Beard and Francis Albarede -- An overview of isotopic anomalies in extraterrestrial materials and their nucleosynthetic heritage / Jean Louis Birck -- Applying stable isotope fractionation theory to new systems / Edwin A. Schauble -- Analytical methods for non-traditional isotopes / Francis Albarede and Brian L. Beard -- Developments in the understanding and application of lithium isotopes in the earth and planetary sciences / Paul B. Tomascak -- The isotope geochemistry and cosmochemistry of magnesium / Edward D. Young and Albert Galy -- The stable-chlorine isotope compositions of natural and anthropogenic materials / Michael A. Stewart and Arthur J. Spivack -- Calcium isotopic variations produced by biological, kinetic, radiogenic and nucleosynthetic processes / Donald J. DePaolo -- Mass-dependent fractionation of selenium and chromium isotopes in low-temperature environments / Thomas M. Johnson and Thomas D. Bullen -- Fe isotope variations in the modern and ancient earth and other planetary

bodies / Brian L. Beard and Clark M. Johnson -- Isotopic constraints on biogeochemical cycling of Fe / Clark M. Johnson, Brian L. Beard, Eric E. Roden, Dianne K. Newman and Kenneth H. Nealson -- The stable isotope geochemistry of copper and zinc / Francis Albarede -- Molybdenum stable isotopes : observations, interpretations and directions / Ariel D. Anbar.

Sommario/riassunto

The goal for Volume 55 of *Reviews in Mineralogy and Geochemistry* was to bring together a summary of the isotope geochemistry of non-traditional stable isotope systems as is known through 2003 for those elements that have been studied in some detail, and which have a variety of geochemical properties. In addition, recognizing that many of these elements are of interest to workers who are outside the traditional stable isotope fields, we felt it was important to include discussions on the broad isotopic variations that occur in the solar system, theoretical approaches to calculating isotopic fractionations, and the variety of analytical methods that are in use. We hope, therefore, that this volume proves to be useful to not only the isotope specialist, but to others who are interested in the contributions that these non-traditional stable isotopes may make toward understanding geochemical and biological cycles. The review chapters in this volume were the basis for a two-day short course on nontraditional stable isotopes held prior (May 15-16, 2004) to the spring AGU/CGU Meeting in Montreal, Canada.

Florentine Cathedral Chaplains in the Fifteenth Century -- 9. The Pope, the Pandolfini, and the Parrochiani of S. Martino a Gangalandi (1465) -- 10. Alessandra Strozzi (1408-1471): The Eventful Life of a Florentine Matron -- Notes -- Index
Sommario/riassunto	In Living on the Edge in Leonardo's Florence, an internationally renowned master of the historian's craft provides a splendid overview

of Italian history from the Black Death to the rise of the Medici in 1434 and beyond into the early modern period. Gene Brucker explores those pivotal years in Florence and ranges over northern Italy, with forays into the histories of Genoa, Milan, and Venice. The ten essays, three of which have never before been published, exhibit Brucker's graceful intelligence, his command of the archival sources, and his ability to make history accessible to anyone interested in this place and period. Whether he is writing about a case in the criminal archives, about a citation from Machiavelli, or the concept of modernity, the result is the same: Brucker brings the pulse of the period alive. Five of these essays explore themes in the premodern period and delve into Italy's political, social, economic, religious, and cultural development. Among these pieces is a lucid, synoptic view of the Italian Renaissance. The last five essays focus more narrowly on Florentine topics, including a fascinating look at the dangers and anxieties that threatened Florence in the fifteenth century during Leonardo's time and a mini-biography of Alessandra Strozzi, whose letters to her exiled sons contain the evidence for her eventful life.
