Sommario/riassunto	In Blood and Capital: The Paramilitarization of Colombia, Jasmin Hristov examines the complexities, dynamics, and contradictions of present-day armed conflict in Colombia. She conducts an in-depth inquiry into the restructuring of the state's coercive apparatus and the phenomenon of paramilitarism by looking at its military, political, and legal dimensions. Hristov demonstrates how various interrelated forms of violence by state forces, paramilitary groups, and organized crime are instrumental to the process of capital accumulation by the local elite as well as the exercise of political power
