

1. Record Nr.	UNINA9910963972103321
Titolo	Last stand : protected areas and the defense of tropical biodiversity // edited by Randall Kramer, Carel van Schaik, Julie Johnson
Pubbl/distr/stampa	New York, : Oxford University Press, 1997
ISBN	0-19-756080-6 1-280-52795-1 9786610527953 0-19-535733-7 1-4294-1588-6
Edizione	[1st ed.]
Descrizione fisica	1 online resource (257 p.)
Collana	Oxford scholarship online
Altri autori (Persone)	KramerRandall A SchaikCarel van JohnsonJulie
Disciplina	333.95/16/0913
Soggetti	Biodiversity conservation - Tropics Conservation biology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Previously issued in print: 1997.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Contributors; 1. Preservation Paradigms and Tropical Rain Forests; 2. Minimizing Species Loss: The Imperative of Protection; 3. The Ecological Foundations of Biodiversity Protection; 4. The Silent Crisis: The State of Rain Forest Nature Preserves; 5. Policy and Practical Considerations in Land-Use Strategies for Biodiversity Conservation; 6. Biodiversity Politics and the Contest for Ownership of the World's Biota; 7. User Rights and Biodiversity Conservation; 8. Tropical Forest Biodiversity Protection: Who Pays and Why 9. Compensation and Economic Incentives: Reducing Pressure on Protected Areas 10. Toward a New Protection Paradigm; Index; A; B; C; D; E; F; G; H; I; J; K; L; M; N; O; P; Q; R; S; T; U; V; W; Y; Z
Sommario/riassunto	During the past century, tropical rain forests have been reduced to about half of their original area, with a consequent loss of biodiversity. This book takes a close look at how this has happened and what the consequences may be, with an emphasis on those strategies that have proven successful in stemming the loss of plant and animal inhabitants.
