Sommario/riassunto	The care of the sick, wounded, and dying during the American Civil War was a complex endeavor that brought ordinary men and women into

contact with the terror of the battlefield. Hospital Transports is a compilation of letters and other papers written by physicians and nurses serving aboard the Union hospital steamboat Daniel Webster in the summer of 1862. The text details sleeping arrangements, cooking and feeding schedules, medical practices, and the incorporation of liberated slaves from the Lee plantation into the daily work of the ship. Clearly described are the emotional, visceral reactions of the corps of medical personnel who, as their ship makes its way along the Potomac picking up casualties, question the philosophies at the root of war, and the metaphysical questions concerning the definitions of life and death.

Sommario/riassunto	The book identifies linguistic issues arising in bilateral income tax conventions and presents an in-dept analysis of tax treaty policies on multilingualism and the administrative practice and case law on the issues raised by the translation of treaties. Individual country surveys discuss the use of legal concepts, including those that do not exist in

the legal system of one of the two contracting states and the way such concepts should be interpreted in such state (e.g. trust). Further, the use of concepts in one state that are similar but not identical to a treaty concept that is well known only in the other state (e.g. droit d'auteur vs copyright) are presented. The book also includes special reports on multilingual issues under both art. 33 of the Vienna Convention and art. 3(2) of the OECD Model Convention and Commentaries. Finally, a specific chapter is devoted to the EU law aspects and a review of the jurisprudence of the European Court of Justice (ECJ)
