The daughter of hysteria: depression as a `woman's problem'?; 3. Labelling women as mad: regulating and oppressing women; 4. Woman as object, not subject: madness as response to objectification and sexual violence; 5. The construction and lived experience of women's distress: positioning premenstrual change as psychiatric illness; 6. Women's madness: resistance and survival; Appendix; Notes; References; Index
Sommario/riassunto	Nominated for the 2012 Distinguished Publication Award of the Association for Women in Psychology!Why are women more likely to be positioned or diagnosed as mad than men?If madness is a social construction, a gendered label, as many feminist critics would argue, how can we understand and explain women's prolonged misery and distress? In turn, can we prevent or treat women's distress, in a non-pathologising women centred way? The Madness of Women addresses these questions through a rigorous exploration of the myths and realities of women's madness.</P>
