Drivers of Stress Test Results-Contributions to Net Income; 28. Net Income and RWAs-Comparison; 29. Net Income and RWAs-Comparison; 30. Parameters of RWAs and Expected Losses-Comparison; 31. Recapitalization Needs-as Percent in gross income; 12. Liquid and Illiquid Assets of the BSL Metric-Haircuts Calibration 13. Outflows of BSL Metric-Run-off Rates Calibration

Sommario/riassunto

This paper examines the stress testing module of the 2013 Financial Sector Assessment Program (FSAP) update for Canada. The IMF report highlights the three major segments of the domestic financial covered during the stress tests. The bank solvency stress tests suggest that while all banks would fall below the Canadian “all-in” Common Equity Tier 1 (CET1) supervisory threshold during severe economic distress, the resulting recapitalization needs are manageable. This IMF report provides recommendations for the Canadian authorities, derived from this joint exercise, to enhance the individual components of their stress testing framework.
