Sommario/riassunto	L'intérêt accordé au corps depuis une vingtaine d'années est caractéristique de l'évolution de notre société. Mais l'épistémologie rationaliste qui est encore la nôtre, fondée sur une séparation entre

l'intelligibilité et la sensibilité, ne permet pas vraiment de réintégrer le corps dans la culture. Le religieux est un domaine bien constitué. Mais sa réactivation et sa recomposition dans les sociétés de cette fin du xxe siècle exigent que nous sachions affiner nos instruments d'investigation, qui ne peuvent plus se limiter aux seules oppositions du savant et du populaire, du légitime et de l'illégitime. Le rapprochement de ces deux objets - le corps et le religieux - peut favoriser la constitution d'une anthropologie du corps et un renouvellement de l'anthropologie des religions. L'une des fonctions permanentes de toutes les pratiques religieuses est la protection du corps menacé (corps des individus et, par métaphore, "corps social"). Les religions sont des instruments d'intégration sociale et des moyens de différenciation culturelle permettant de poser à la fois la question de l'identité et du traitement social du corps.

### Sommario/riassunto

This 12th edition of *Advances in the Economic Analysis of Participatory and Labor-Managed Firms* contains a stimulating collection of original papers spanning a wide variety of topics. Part 1 of the volume contains three papers on the subject of job design and organizational performance, covering the determinants of multiskilling from a theoretical perspective and also the empirical effect of multiskilling and teams on financial performance. Part 2 of the volume concerns compensation, worker attitudes, and productivity. Papers in this section cover the effect of rules and costs on employer-provided health insurance, majority ownership and executive compensation, worker attitudes towards different forms of employee ownership and variable pay, and an analysis of performance-related pay, unions, and productivity in Italy. Part 3 contains three studies of worker cooperatives and nonprofit organizations in Italy, Spain, and Uruguay. The volume concludes with a debate on free trade and the ecological effects of alternative socio-economic systems.
