

1. Record Nr.	UNINA9910964256003321
Autore	Kato Hideaki
Titolo	Clostridium difficile-associated diarrhea / / Hideaki Kato, [Haru Kato]
Pubbl/distr/stampa	Hauppauge, N.Y., : Nova Science Publishers, 2010
ISBN	1-61324-466-5
Edizione	[1st ed.]
Descrizione fisica	1 online resource (62 p.)
Collana	Public health in the 21st century Bacteriology research developments
Altri autori (Persone)	KatoHaru
Disciplina	616.9/31
Soggetti	Clostridium diseases Clostridium difficile Diarrhea
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Historical perspective -- Genetic organization -- Epidemiology -- Classification -- Risk factors -- Pathogenecity -- Symptoms -- Diagnosis -- BIII/NAP1/027 strain -- Treatment -- Prevention.
Sommario/riassunto	Clostridium Difficile is a gram-positive anaerobic, spore-forming bacterium involved in antibiotic-associated diarrhea and colitis, which is developed after administration of antibiotics. This book deals with the occurrence of and treatment options for clostridium difficile among patients who develop this condition.
