

1. Record Nr.	UNINA9910964262803321
Titolo	Laser ablation : effects and applications // Sharon E. Black, editor
Pubbl/distr/stampa	Hauppauge, N.Y., : Nova Science Publishers, c2011
ISBN	1-61209-189-X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (290 p.)
Collana	Lasers and electro-optics research and technology
Altri autori (Persone)	BlackSharon E
Disciplina	621.36/6
Soggetti	Laser ablation Lasers - Industrial applications
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- LASER ABLATION: EFFECTS AND APPLICATIONS -- LASER ABLATION: EFFECTS AND APPLICATIONS -- CONTENTS -- PREFACE -- Chapter 1 DOUBLE-PULSE LASER ABLATION OF SOLID TARGETS IN AMBIENT GAS: MECHANISMS AND EFFECTS -- ABSTRACT -- 1. INTRODUCTION -- 2. NANOSECOND-NANOSECOND PULSES COMBINATION: EFFECTS OF DP-LA -- a) Collinear Beams Configuration -- Effects on plasma emission -- Plasma dynamics -- Mass removal mechanisms, atomized ablated mass and effects of the matrix target -- Dependence on ambient gas pressure -- b) Orthogonal Beams Pre-Ablation Configuration -- c) Orthogonal Beams Re-Heating Configuration -- 3. NANOSECOND-NANOSECOND PULSES COMBINATION: DISCUSSION ON THE MECHANISMS -- a) Target Heating Effects -- b) Atmospheric Effects on Laser Shielding -- Laser supported detonation and laser ablation -- Laser supported detonation wave and ambient gas pressure -- Laser absorption in double pulse configuration -- Mass removal mechanisms in DP schemes -- 4. DOUBLE PULSE WITH SHORT AND ULTRASHORT LASER PULSES: EFFECTS AND MECHANISMS -- PERSPECTIVES AND FUTURE DEVELOPMENT -- ACKNOWLEDGMENTS -- REFERENCES -- Chapter 2 ASSESSING HUNTER-GATHERER MOBILITY IN CIS-BAIKAL, SIBERIA USING LA-ICP-MS: METHODOLOGICAL CORRECTION FOR LASER INTERACTIONS WITH CALCIUM PHOSPHATE MATRICES AND THE POTENTIAL FOR INTEGRATED LA-ICP-MS SAMPLING OF ARCHAEOLOGICAL SKELETAL MATERIALS -- ABSTRACT -- INTRODUCTION -- HUNTER GATHERER MOBILITY IN CIS-

BAIKAL -- KHUZHIR-NUGE XIV CEMETERY -- PRINCIPLE OF STRONTIUM CATCHMENT -- TOOTH MINERALIZATION -- LASER ABLATION OF TEETH -- MATERIALS AND METHODS -- RESULTS AND DISCUSSION -- CONCLUSION -- REFERENCES -- Chapter 3 MODELING OF LASER ABLATION INDUCED BY NANOSECOND AND FEMTOSECOND LASER PULSES -- ABSTRACT -- 1. INTRODUCTION -- 2. MODELING OF NANOSECOND LASER ABLATION.

2.1. Primary Mechanisms of the Material Ejection under Nanosecond Laser Action -- 2.2. Secondary Mechanisms: Plasma Plume Expansion after Nanosecond Laser Pulse -- 2.2.1. Combined LP -DSMC method -- 2.2.2. Results of the combined LP -DSMC calculations -- 3. MODELING OF SHORT AND ULTRA-SHORT (FEMTOSECOND) LASER ABLATION -- 3.1. Primary Mechanisms of the Material Ejection under Femtosecond Laser Action -- 3.1.1. Metallic targets -- 3.1.2. Dielectric targets -- 3.2. Secondary Mechanisms: Plasma Plume Expansion after Femtosecond Laser Pulse -- CONCLUSION -- REFERENCES -- Chapter 4 FABRICATION OF SILICON NANOCRYSTAL BASED STRUCTURES WITH NANOSECOND LASER ABLATION PROCESSINGS IN LIQUID MEDIA -- ABSTRACT -- 1. INTRODUCTION -- 2. EXPERIMENTAL DETAILS -- 2.1. Laser Ablation -- 2.2. Laser Fragmentation -- 3. SI-NCS AND SI-NCS BASED COMPOSITES PRODUCED BY LASER ABLATION IN LIQUID MEDIA -- 4. INDUCED SELF-ASSEMBLY & -- TUNING OF SI-NCS OPTICAL PROPERTIES BY NS LASER FRAGMENTATION IN LIQUID MEDIA -- 5. PHYSICS OF THE NANOSECOND-LASER PROCESSINGS IN LIQUID MEDIA -- CONCLUSION -- ACKNOWLEDGMENTS -- REFERENCES -- Chapter 5 HO:YAG LASER LITHOTRIPSY -- ABSTRACT -- INTRODUCTION -- MECHANISM OF HO:YAG LASER LITHOTRIPSY -- PROPERTIES OF HO:YAG LASER LITHOTRIPSY -- FIBERS FOR HO:YAG LASER LITHOTRIPSY -- SAFETY ASPECT OF HO:YAG LASER LITHOTRIPSY -- CONCLUSIONS -- REFERENCES -- Chapter 6 COMPUTER MODELLING OF FEMTOSECOND LASER ABLATION OF SEMICONDUCTORS AND DIELECTRICS -- ABSTRACT -- 1. INTRODUCTION -- 2. MOLECULAR DYNAMICS SIMULATION -- 3. THE FOKKER-PLANK APPROACH -- 4. TWO-TEMPERATURE MODELS -- 5. COMPUTATION OF CRATER GEOMETRY -- REFERENCES --

Chapter 7 THERMOPHYSICAL EFFECTS OF FEMTOSECOND LASER ABLATION ON A METAL TARGET -- Abstract -- 1. Introduction -- 2. Effect of Pulse Width and Fluence of Femtosecond Laser on the Electron-phonon Relaxation Time -- 2.1. Two-temperature Model. 2.2. Electron Thermal Diffusion Length -- 2.3. Results and Discussion -- 2.3.1. The space-and-time-dependence of electron and lattice temperature of target -- 2.3.2. The numerical solution of electron-phonon relaxation time -- 2.3.3. Effect of pulse width of femtosecond laser on the electron-phonon relaxation time -- 2.3.4. Effect of fluence of femtosecond laser on the electron-phonon relaxation time -- 2.3.5. Heat-affected zone per pulse as a function of laser fluence -- 3. Improved Two-temperature Model and its Application in Femtosecond Laser Ablation of Metal Target -- 3.1. The Effect of Temperature on Heat Capacity and Thermal Conductivity of the Electrons -- 3.2. Electron Temperature Dependence of the Absorption Coefficient and the Absorptivity -- 3.3. Verification of Absorption Coefficient Analytic Approximation -- 3.4. The Improved Two Temperature Model -- 3.5. Results and Discussion -- 3.5.1. The Time-dependence of Electron and Lattice Temperature of Target -- 3.5.2. Ablation rate per pulse as a function of laser fluence -- 4.

A Unified Thermal Model of Thermophysical Effects with Pulse Width from Nanosecond to Femtosecond -- 4.1. The Unified Model -- 4.1.1. Physical background -- 4.1.2. The contents of our model -- 4.2. Results and Discussions -- 4.2.1. Determination of the value of α -- 4.2.2. The evolution of vaporization threshold fluence with laser pulse width -- 5. Conclusion -- 6. Acknowledgments -- References -- Chapter 8

FORMATION OF NANOPARTICLES UNDER LASER ABLATION OF SOLIDS IN LIQUIDS -- ABSTRACT -- INTRODUCTION -- General Setup of Laser Ablation in Liquids -- EXPERIMENTAL TECHNIQUE -- 1. Pulse Duration -- 2. Laser Wavelength -- 3. Repetition Rate -- HISTORICAL REVIEW -- LASER ABLATION OF AN AG TARGET IN LIQUID ENVIRONMENT -- LASER ABLATION OF AN AU TARGET IN LIQUID ENVIRONMENT -- INTERACTION OF NANOPARTICLES WITH LASER BEAM -- FRAGMENTATION OF NP UNDER LASER EXPOSURE IN LIQUIDS -- SHAPE-SELECTIVE FRAGMENTATION -- FORMATION OF THE AU-AG ALLOY UNDER LASER IRRADIATION OF NANOPARTICLES. NANOPARTICLES OF CU, BRASS, AND BRONZE -- INTERNAL SEGREGATION OF BRASS NP -- SELF-INFLUENCE OF A FEMTOSECOND LASER BEAM -- INFLUENCE OF THE NATURE OF THE LIQUID -- Ablation of a Ti Target -- Ablation of Sn -- W and Mo NP -- Modeling of Distribution Function -- INFLUENCE OF INTENSITY DISTRIBUTION OF THE LASER BEAM ON THE SHAPE OF NANOPARTICLES -- NANOSTRUCTURING OF SOLIDS UNDER THEIR LASER ABLATION IN LIQUIDS -- EXCITATION OF HIGH ENERGY LEVELS -- CONCLUSION -- REFERENCES -- Chapter 9 NANODIAMONDS FROM LASER ABLATION IN LIQUID -- ABSTRACT -- 1. INTRODUCTION -- 2. LASER ABLATION IN LIQUID -- 2.1. Fundamental Processes in Laser Ablation in Liquid -- 2.2. Synthesis of Nanocrystals Using Laser Ablation in Liquid -- 3. PULSED-LASER INDUCED LIQUID-SOLID INTERFACE REACTION -- 3.1. PLIIR Apparatus -- 3.2. Thermodynamic and Kinetic Factors of PLIIR -- 4. DIAMOND NANOCRYSTALS SYNTHESIS BY PLIIR -- 4.1. Synthesis of Nanodiamonds by PLIIR -- 4.2. Thermodynamic Nucleation of Diamonds upon PLIIR -- 4.3. Graphite-Diamond Phase Transition upon PLIIR -- 4.4. Structural Transformation of Diamonds upon PLIIR -- 4.5. Stability of Nanodiamonds Synthesized by PLIIR -- CONCLUSION -- ACKNOWLEDGMENTS -- REFERENCES -- INDEX -- Blank Page.

Sommario/riassunto

Laser ablation is the process of removing material from a solid (or occasionally liquid) surface by irradiating it with a laser beam. This book presents research in the study of laser ablation.
