Sommario/riassunto

During the 1970s and '80s economic relations between the Arab Gulf States and Japan grew enormously. Approximately 65% of Japan's oil requirements were met from Arab Gulf resources. However, although Japanese imports of Arab oil comprise the major component of trade, Arab imports of Japanese goods are also increasing sharply. The seven Arab Gulf countries, represented by the Petroleum Information Committee accounted for 8% of Japan's total exports. This book explores the various avenues of economic co-operation that have developed between Japan and the Gulf States both in energy and other a

| Sommario/riassunto | With Inclusion, Steven Epstein argues that strategies to achieve diversity in medical research mask deeper problems, ones that might require a different approach and different solutions. Formal concern with this issue, Epstein shows, is a fairly recent phenomenon. Until the mid-1980s, scientists often studied groups of white, middle-aged men—and assumed that conclusions drawn from studying them would apply to the rest of the population. But struggles involving advocacy groups, experts, and Congress led to reforms that forced researchers to diversify the population from which they drew for clin |
