Sommario/riassunto	Assessment of Young Children with Special Needs, Second Edition helps prepare teachers for the task of evaluating the skills of infants,

toddlers, and preschool children with developmental delays and those considered at risk to experience developmental delays or difficulties. A child's environment is a critical consideration when focusing on assessment, and authors Susan Benner and Joan Grim explore the important issues of family resources, health, multidimensional environmental influences, economic deprivation, and domestic violence on infant and child development.
