

1. Record Nr.	UNINA9910964376203321
Titolo	Boreal birds of North America : a hemispheric view of their conservation links and significance // Jeffrey V. Wells, editor
Pubbl/distr/stampa	Berkeley [Calif.], : University of California Press, 2011
ISBN	9786613289544 9781283289542 1283289547 9780520950580 0520950585
Edizione	[1st ed.]
Descrizione fisica	1 online resource (160 p.)
Collana	Studies in avian biology ; ; no. 41
Altri autori (Persone)	WellsJeffrey V <1964-> (Jeffrey Vance)
Disciplina	639.9/78
Soggetti	Forest birds - Canada Forest birds - Alaska Birds - Ecology - North America Taiga ecology - North America
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"A publication of the Cooper Ornithological Society."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- Contents -- Contributors -- Preface -- Acknowledgments -- 1. Boreal Forest Threats And Conservation Status -- 2. Global Role For Sustaining Bird Populations -- 3. Waterfowl Conservation Planning: Science Needs And Approaches -- 4. Breeding Distribution And Ecology Of Pacific Coast Surf Scoters -- 5. Geospatial Modeling Of Abundance With Breeding Bird Atlas Data -- 6. The Boreal Landbird Component Of Migrant Bird Communities In Eastern North America -- 7. Boreal Migrants In Winter Bird Communities -- 8. Important Bird Areas As Wintering Sites For Boreal Migrants In The Tropical Andes -- 9. Understanding Declines In Rusty Blackbirds -- Index -- Series List
Sommario/riassunto	Reaching from interior Alaska across Canada to Labrador and Newfoundland, North America's boreal forest is the largest wilderness area left on the planet. It is critical habitat for billions of birds; more than 300 species regularly breed there. After the breeding season, many boreal birds migrate to seasonal habitats across the United

States, Mexico, the Caribbean, and Central and South America. This volume brings together new research on boreal bird biology and conservation. It highlights the importance of the region to the global avifauna and to the connectivity between the boreal forest and ecoregions throughout the Americas. The contributions showcase a unique set of perspectives on the migration, wintering ecology, and conservation of bird communities that are tied to the boreal forest in ways that may not have been previously considered.
