The Skin in Question: Working with Ellen May; 8. Acting, Feeling and Thinking: Working with Tracey; 9. A Body in Pieces: Working with Peter; 10. Self-Harm by Omission: Working with Kate; 11. Reflections on Case Study Themes 12. The Self-Harming Individual and 'The System'Bibliography; Subject Index; Author Index
Sommario/riassunto	The book takes a new look at self-harm, focusing particularly on the under-explored area of `hidden' self-harming behaviour. These behaviours may not be immediately identifiable as self-harm by counsellors, therapists or their clients, but Turp shows how recognition and understanding of hidden self-harm can improve practice with

those affected.

2. Record Nr.	UNINA9910337920203321
Autore	Rossi Sergio
Titolo	Oceans in decline // by Sergio Rossi
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Copernicus, , 2019
ISBN	3-030-02514-4
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (350 pages)
Disciplina	577.7 551.46
Soggetti	Nature Ecology Oceanography Wildlife Fishes Climatic changes Water quality Water - Pollution Popular Science in Nature and Environment Fish & Wildlife Biology & Management Climate Change Water Quality/Water Pollution
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Prologue -- Seas of Yore -- Effects of Overfishing -- Effects of Pollution -- Effects of Climate Change -- Future Perspectives -- Epilogue.
Sommario/riassunto	What is happening in our oceans? By describing their main elements, this book shows how and why the oceans are being transformed, and suggests possible future scenarios to address this complex, yet often-asked, question. The ocean is being dramatically transformed, but the

magnitude of this transformation remains unclear since the ocean is largely inaccessible and still unknown: there is more information about the outer universe than about the deepest parts of our oceans. The author, a marine biologist with extensive research experience, offers a holistic view of our oceans. Focusing on fishing, pollution and the effects of climate change, he identifies and describes the changes occurring in all marine ecosystems, and discusses the long-passed state of equilibrium.
