Sommario/riassunto

This textbook is a comprehensive family practice resource for primary care clinicians. It provides current national practice guidelines that provide the foundational standard of care for practice helping the clinician to deliver high quality primary health care to patients across the lifespan in the outpatient setting. The book features details on physical examination and diagnostic testing, information on health promotion, guidelines of care, dietary information, procedures, national resources for patient use, and patient education handouts all in one resource!. Patient Teaching Sheets are
