Nota di bibliografia	
Sommario/riassunto	"European Security after Iraq" examines the impact of the 'second' Gulf War on European politics. It explores key questions about the impact of the conflict on national, European and transatlantic politics such as the extent to which the war has created new cleavages between the foreign and security policies of European states or merely confirmed existing ones. Its national focus is on states on both the so-called 'old' and 'new' Europe (a classification the book, in fact, calls into question). Important issues around the institutional architecture of European security before and after the war are also discussed. The book's nine chapters deal with background issues, such as the place of the war in the broader discourse of European security, institutional analyses of NATO and the EU, and area studies of France, the Balkans, eastern Europe and Turkey. It will be of particular use in upper level undergraduate and taught postgraduate courses on contemporary Europe, transatlantic relations and international security.
