Sommario/riassunto	The three-volume edition of Wordsworth's poems is the most comprehensive edition now in print and contains reading texts chosen from the 21 volumes of the Cornell Wordsworth. It is without a doubt the most pleasurable way to read Wordsworth's poems in their entirety. Volume 2 includes the thirteen-book Prelude of 1805-06, Benjamin the Waggoner, The Tuft of Primroses (and other poems composed for the unfinished Recluse), The Excursion (in the text of the first edition in 1814) , The White Doe of Rylstone , and translations from Chaucer and Virgil. This title is also available as a searchable PDF ebook, from Humanities-Ebooks.co.uk, or to Lbraries from Ingram Digital. A Free PDF Addendum to this edition is now available from Humanities-Eooks, containing additional texts of An Evening Walk , The Baker's Cart, The Ruined Cottage , Nutting , Yew-Trees , the odes of 1815-17, Nab Well and Guilt and Sorrow , with the full 40-page index to the three printed volumes. With the Addendum the complete 3-volume edition is now 2600 pages. The editor, Jared Curtis, is Professor Emeritus of English at Simon Fraser University, also edited 'Poems, in Two Volumes' and Other Poems, 1800-1807, Last Poems, 1821-1850, and was co-editor with Carol Landon of Early Poems and Fragments, 1785-1797 , all in the Cornell Wordsworth.

		Special Purpose and Application-Based Systems
		Theory of Computation
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Bibliographic Level Mode of Issuance: Monograph
	Nota di bibliografia	Includes bibliographical references and author index.
	Nota di contenuto	Modeling Techniques and Infrastructures -- The Case for Modeling Security, Privacy, Usability and Reliability (SPUR) in Automotive Software -- Addressing Cross-Tool Semantic Ambiguities in Behavior Modeling for Vehicle Motion Control -- A Software and System Modeling Facility for Vehicle Environment Interactions -- Model Transformations -- Generating Sound and Resource-Aware Code from Hybrid Systems Models -- Towards Verification of Model Transformations Via Goal-Directed Certification -- Quality Assurance -- An Instrumentation-Based Approach to Controller Model Validation -- TestML - A Test Exchange Language for Model-Based Testing of Embedded Software -- Towards Integrated Model-Driven Verification and Empirical Validation

of Reusable Software Frameworks for Automotive Systems -- Real-Time Control -- Modeling with the Timing Definition Language (TDL) -- Towards Model-Driven Development of Hard Real-Time Systems -- Services and Components -- Reusable Services and Semi-automatic Service Composition for Automotive Software.

Sommario/riassunto	This book constitutes the thoroughly refereed post-workshop proceedings of the Second Automotive Software Workshop, ASWSD 2006, held in San Diego, CA, USA in March 2006. The 11 revised full papers presented were carefully reviewed and selected from 18 lectures held at the workshop, that brought together experts from industry and academia, working on highly complex, distributed, reactive software systems related to the automotive domain. The papers are organized in topical sections on modeling techniques and infrastructures, model transformations, quality assurance, real-time control, as well as services and components.
