A Critical Commentary; 21 State building from Below - Towards a Balanced View; 22 The Impact of Communication Theory on the Analysis of the Early Modern State building Processes; 23 Empowering Interactions and Intertwining Jurisdictions; Index</p>
Sommario/riassunto	<p>This volume explores the emergence of the state in Europe between the fourteenth and nineteenth centuries. Through a series of case studies and historiographical, methodological and theoretical essays, it challenges the traditional top-down model of state development long held by historians. Instead it explores the numerous ways in which non-elite groups could influence the formation of national political institutions</p>
