

1. Record Nr.	UNINA9910964749803321
Titolo	Piezoceramic materials and devices // Ivan A. Parinov, editor
Pubbl/distr/stampa	New York, : Nova Science Publishers, c2010
ISBN	1-61728-958-2
Edizione	[1st ed.]
Descrizione fisica	1 online resource (349 p.)
Collana	Materials science and technologies
Altri autori (Persone)	ParinovIvan A
Disciplina	620.1/4
Soggetti	Piezoelectric ceramics Piezoelectric devices
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	<p>""PIEZOCERAMIC MATERIALS AND DEVICES ""; ""PIEZOCERAMIC MATERIALS AND DEVICES ""; ""DEDICATION ""; ""CONTENTS""; ""PREFACE""; ""LEAD-FREE LONG AGO ""; ""ABSTRACT ""; ""1. INTRODUCTION ""; ""2. DIELECTRIC AND PIEZOELECTRIC PROPERTIES OF NaNbO<sub>3</sub>-BASED SOLID SOLUTIONS ""; ""3. CRYSTAL-CHEMICAL EFFECTS OF THERMODYNAMIC HISTORY ON COMPOSITIONa€?TEMPERATURE PHASE DIAGRAMS OF (Na, Li)NbO<sub>3</sub> AND (Na, K)NbO<sub>3</sub> SOLID SOLUTIONS ""; ""4. MODIFICATION OF (Na, Li)NbO<sub>3</sub> SOLID SOLUTIONS WITH HETEROVALENT CATIONS ""; ""4.1. Solid Solutions with nMA &gt; nA (SS-1 And SS-2) ""</p> <p>""4.2. Solid Solutions with nMB nB (SS-4 And SS-5)""; ""5. THE PHASE DIAGRAM AND PROPERTIES OF SOLID SOLUTIONS OF THE TERNARY SODIUM-LITHIUM-POTASSIUM NIOBATE SYSTEM ""; ""6. PHASE DIAGRAMS AND FERROELECTRIC PROPERTIES OF SOLID SOLUTIONS OF THE TERNARY SYSTEMS (Na, Li, Cd<sub>0.5</sub>)NbO<sub>3</sub> AND (Na, Li, Sr<sub>0.5</sub>)NbO<sub>3</sub> ""; ""6.1. Solid Solutions of the (Na, Li, Cd<sub>0.5</sub>)NbO<sub>3</sub> System ""; ""6.2. Solid Solutions of the (Na, Li, Sr<sub>0.5</sub>)NbO<sub>3</sub> System ""</p> <p>""7. PRODUCTION AND DIELECTRIC PROPERTIES OF LEAD-FREE CERAMICS WITH THE FORMULA [(Na<sub>0.5</sub>K<sub>0.5</sub>)<sub>1-a€?</sub>XLiX](Nb<sub>1-a€?</sub>Y a€? ZTaYsBz)O<sub>3</sub> """"7.1. Objects of Investigation ""; ""7.2. Methods of Sample Production ""; ""7.3. Methods of Sample Analysis ""; ""8. DEFORMATION, POLARIZATION, AND REVERSIBLE PROPERTIES OF LEAD-FREE CERAMICS BASED ON ALKALI METAL NIOBATES""; ""9. CONCLUSIONS ""; ""REFERENCES ""; ""HIGH PERFORMANCE OF</p>

ADVANCED COMPOSITES BASED ON RELAXOR-FERROELECTRIC SINGLE CRYSTALS ""; ""ABSTRACT ""; ""1. INTRODUCTION ""  
 ""2. RELAXOR-FERROELECTRIC SOLID SOLUTIONS AND THEIR ELECTROMECHANICAL PROPERTIES "" ""3. COMPOSITES WITH 2a€?2-TYPE CONNECTIVITY AND THEIR PERFORMANCE ""; ""3.1 2a€?2-Parallel-Connected Composite Based on PZNa€?0.07PT: Effect of the Orientation of Crystallographic Axes ""; ""3.2 2a€?2a€?0 Composite Based on PZNa€?0.07PT: Effect of Porosity in Polymer Layers ""; ""3.3 2a€?2 Composite Based on PZNa€?0.07PT: Illustrative Example of Combination of Electromechanical Properties ""; ""3.4 2a€?2 Composite Based on PMNa€?0.33PT: Key Role of the Single-Domain State ""  
 ""4. THE 1a€?3-TYPE COMPOSITES AND THEIR PERFORMANCE "" ""4.1 Maxima of Effective Parameters of 1a€?3-Type Composites""; ""4.2 Piezoelectric Response of 1a€?2a€?2 Composites ""; ""5. COMPARISON OF THE PERFORMANCE OF FERROELECTRIC CERAMIC / POLYMER COMPOSITES""; ""6. Sommario/riassunto

Piezoelectric materials and composites and also the devices based on them have found wide applications in the modern technologies. This book drives the reader from the concepts and ideas in this scientific area to theoretical, model and experimental results obtained some internationally recognised research teams.
