

1. Record Nr.	UNINA9910786060503321
Autore	Whyman Rose
Titolo	Stanislavski : the basics // by Rose Whyman
Pubbl/distr/stampa	Boca Raton, FL : , : Routledge, an imprint of Taylor and Francis, , 2013
ISBN	1-135-13267-4 1-283-99423-2 0-203-07760-1 1-135-13268-2
Edizione	[First edition.]
Descrizione fisica	1 online resource (209 p.)
Collana	The basics
Disciplina	792.02/8092 B
Soggetti	PERFORMING ARTS / Acting & Auditioning Acting
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Stanislavski's life and context -- An actor's work: basic training -- Attention, muscular release, sense and emotion memory, action, justification, experiencing -- An actor's work: analysis of the play -- If and given circumstances, bits and tasks, supertask, truth and belief, method of physical actions, active analysis -- An actor's work: consolidation and spontaneity -- Imagination, adaptation, communication, here, today, now, through-line, subtext -- An actor's work: embodiment of the role: training the body and voice, outer characteristics, the finishing touches, tempo-rhythm, perspective, logic and sequence, control and finish, I am being -- Stanislavski's legacy and influence.
Sommario/riassunto	Stanislavski: The Basics is an engaging introduction to the life, thought and impact of Konstantin Stanislavski. Regarded by many as a great innovator of twentieth century theatre, this book examines Stanislavski's ideas in practical contexts, impact on modern theatre, life and the context of his writings, major works in English translation. With further reading throughout, a glossary of terms and a comprehensive chronology, this text makes the ideas and theories of Stanislavski available to an undergraduate audience.

2. Record Nr.	UNINA9910144921603321
Titolo	Logical Foundations of Computer Science : 4th International Symposium, LFCS'97, Yaroslavl, Russia, July, 6 - 12, 1997, Proceedings // edited by Sergei Adian, Anil Nerode
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 1997
ISBN	3-540-69065-4
Edizione	[1st ed. 1997.]
Descrizione fisica	1 online resource (IX, 436 p.)
Collana	Lecture Notes in Computer Science, , 0302-9743 ; ; 1234
Disciplina	004/.01/5113
Soggetti	Computers Logic, Symbolic and mathematical Computer logic Theory of Computation Mathematical Logic and Formal Languages Logics and Meanings of Programs Mathematical Logic and Foundations
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Topological semantics for hybrid systems -- Domain-free pure type systems -- Generic queries over quasi-o-minimal domains -- Towards computing distances between programs via Scott domains -- A safe recursion scheme for exponential time -- Finite model theory, universal algebra and graph grammars -- Complexity of query answering in logic databases with complex values -- Recognition of deductive data base stability -- The concurrency complexity for the Horn fragment of linear logic -- Studying algorithmic problems for free semi-groups and groups -- Learning small programs with additional information -- Cut elimination for the second order propositional logic with Hilbert's ?-symbol, extensionality, and full comprehension -- Finite bases of admissible rules for the logic S52 C -- An algebraic correctness criterion for intuitionistic proof-nets -- Towards a theory of recursive structures -- On the complexity of prefix formulas in modal logic of subset spaces -- The undecidability of second order linear affine logic

-- Operational logic of proofs with functionality condition on proof predicate -- On linear ordering of strongly extensional finitely-branching graphs and non-well-founded sets -- Functions for the general solution of parametric word equations -- A proof procedure for hereditary Harrop formulas with free equality -- Basic forward chaining construction for logic programs -- Decidability and undecidability of the halting problem on Turing machines, a survey -- Case study: Additive linear logic and lattices -- Some decision problems for traces -- Existential instantiation and strong normalization -- Models for the logic of proofs -- Interpretation of the full computation tree logic CTL* on sets of infinite sequences -- Type introduction for equational rewriting -- Capturing bisimulation-invariant Ptime -- Equivalence of multiplicative fragments of cyclic linear logic and noncommutative linear logic -- A decidable fragment of second order linear logic -- Some results on Propositional Dynamic Logic with fixed points -- Quasi-characteristic inference rules for modal logics -- Provability logic with operations on proofs -- Formal verification of logic programs: Foundations and implementation -- Unification of terms with term-indexed variables -- Back-forth equivalences for design of concurrent systems -- Association nets: An alternative formalization of common thinking -- Simulating λ -expansions with λ -reductions in the second-order polymorphic λ -calculus -- Logical schemes for first order theories -- Verification of PLTL formulae by means of monotone disjunctive normal forms.

Sommario/riassunto

This book constitutes the refereed proceedings of the 4th International Symposium on Logical Foundations of Computer Science, LFCS'97, held in Yaroslavl, Russia, in July 1997. The volume presents 42 revised refereed papers carefully selected by the program committee. All current issues of computer science logic are addressed. There is a certain emphasis on reporting the progress achieved by scientists from various parts of the former Soviet Union; but there are also many other strong papers from the international research community.

3. Record Nr.	UNINA9910964853803321
Autore	Ozkan Behlul <1975->
Titolo	From the abode of Islam to the Turkish vatan : the making of a national homeland in Turkey // Behlul Ozkan

Nota di contenuto	Frontmatter -- Contents -- Acknowledgments -- Introduction -- 1. Searching For A New Legitimacy: Ottoman Patriotism And Imperial Vatan -- 2. From Imperial To National Vatan -- 3. From Geography To Vatan -- 4. Vatan And Turkey's Foreign Policy -- Conclusion -- Notes -- Illustration Credits -- Index
Sommario/riassunto	How does a people move from tribal and religiously based understandings of society to a concept of the modern nation-state? This book examines the complex and pivotal case of Turkey. Tracing the shifting valences of vatan (Arabic for "birthplace" or "homeland") from the Ottoman period-when it signified a certain territorial integrity and imperial ideology-through its acquisition of religious undertones and its evolution alongside the concept of millet (nation), Behlül Özkan engages readers in the fascinating ontology of Turkey's protean

imagining of its nationhood and the construction of a modern national-territorial consciousness.
