

1. Record Nr.	UNINA9910964889203321
Titolo	Main-chain modification as a result of polyolefin functionalization by different techniques // Rosestela Perera ... [et al.]
Pubbl/distr/stampa	Hauppauge, N.Y., : Nova Science Publishers, c2010
ISBN	1-61728-252-9
Edizione	[1st ed.]
Descrizione fisica	1 online resource (75 p.)
Collana	Polymer science and technology
Altri autori (Persone)	PereraRosestela
Disciplina	668.4/234
Soggetti	Polyolefins Graft copolymers
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Techniques used to prepare grafted polythylenes -- Secondary and/or degradation reactions in the grafting process -- Molecular weight distribution and rheological properties -- Thermal properties and thermogravimetric analysis.
Sommario/riassunto	When polyolefins are functionalised to modify its chemical structure and polarity, some other secondary reactions take place as well. This book deals with modifications of the main chain as a consequence of polyolefin grafting through different techniques.
