

1. Record Nr.	UNINA9910964928103321
Autore	Stroud Clare
Titolo	Developing Multimodal Therapies for Brain Disorders : Proceedings of a Workshop
Pubbl/distr/stampa	Washington, D.C. : , : National Academies Press, , 2017 ©2017
ISBN	0-309-45029-2 0-309-45027-6
Edizione	[1st ed.]
Descrizione fisica	1 online resource (97 pages)
Altri autori (Persone)	KerenNoam I BainLisa
Disciplina	616.8/046
Soggetti	Brain - Diseases - Adjuvant treatment Combined modality therapy Combined Modality Therapy Brain Diseases - therapy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction -- Multimodal therapy: overview of principles, barriers, and opportunities -- Exploring the state of the science -- Exploring the state of the science -- Regulatory and reimbursement considerations -- Trial designs to establish efficacy and safety in multimodal therapies -- Developing multimodal therapies: practical considerations relating to industry -- Role of research funders in multimodal therapy development -- Appendix A: References -- Appendix B: Workshop agenda -- Appendix C: Registered participants.
Sommario/riassunto	"Multimodal therapy approaches that combine interventions aimed at different aspects of disease are emerging as potential--and perhaps essential--ways to enhance clinical outcomes for patients with psychiatric and neurological disorders. In order to examine the general principles underlying multimodal therapies and to explore challenges, potential barriers, and opportunities for their development, the National Academies of Sciences, Engineering, and Medicine convened a workshop in June 2016. Participants explored scientific, clinical, regulatory, and reimbursement issues related to multimodal

approaches and potential opportunities to enhance clinical outcomes for individuals with nervous system disorders. This publication summarizes the presentations and discussions from the workshop"--
