

1. Record Nr.	UNISA996209817203316
Titolo	Alexandria journal of medicine
Pubbl/distr/stampa	[Alexandria, Egypt], : Alexandria University Faculty of Medicine [Abingdon, England], : Taylor & Francis
ISSN	2090-5076
Descrizione fisica	1 online resource
Soggetti	Medicine Periodical Periodicals.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	Refereed/Peer-reviewed Production and hosting by Elsevier B.V.

2. Record Nr.	UNINA9910965043803321
Autore	Koubeissi Mohamad Z
Titolo	Extratemporal lobe epilepsy surgery / / Mohamad Z. Koubeissi and Robert J. Maciunas
Pubbl/distr/stampa	Montrouge, France, : John Libbey Eurotext, 2011
ISBN	9782742011803 2742011803
Descrizione fisica	1 online resource (529 p.)
Collana	Progress in epileptic disorders / International Epilepsy Colloquium- Cleveland, , 1777-4284 ; ; v. 10
Altri autori (Persone)	MaciunasRobert J
Disciplina	616.853
Soggetti	Epilepsy - Surgery Epileptics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	section 1. Semiology of extratemporal epilepsy -- section 2. Non-invasive neurophysiology of extratemporal lobe epilepsies -- section 3. Neuroimaging of extra temporal lobe epilepsies -- section 4. Invasive evaluation of extratemporal lobe epilepsies -- section 5. Surgery and outcome of extratemporal lobe epilepsies.
Sommario/riassunto	The theme of the Cleveland colloquium which took place in May 2010 was extratemporal lobe epilepsy surgery. Patients with refractory extratemporal lobe epilepsy, particularly those in whom imaging examinations did not reveal any brain lesions, have a less positive prognosis after surgery than those with mesial temporal lobe epilepsy. The semiology of seizures, the functional imaging techniques, neuropsychological evaluation and intracranial EEG are used to select surgical patients. Moreover, a large number of centres have experimented with new methods for identifying the epileptogenic area in these patients. This work outlines diagnostic and prognostic tools available as well as epilepsy surgery. Written by international experts who attended the Cleveland colloquium, it will be all the more useful to neurologists, neurosurgeons and epileptologists as no other work until now has focused on this subject.
