Sommario/riassunto	In The State, The Family and Education, first published in 1980, Miriam David provides an entirely new analysis of the relationship of the State

to the family and education. David shows how the State, through its educational policies, regulates family relationships with, and within, schools. This book provides a welcome analysis of educational policy from a socialist-feminist perspective, re-examining the ways in which women as parents, teachers and pupils are involved in the education system. This book will be of interest to students of education.
