Study of Landscapes as an Approach to Openness to Others -- Further Reading -- Index

Sommario/riassunto

It is now widely recognised that learning a language should not just involve linguistic competence but also intercultural competence. It is also clear that intercultural competence can be developed through related subjects such as geography, history, mother tongue teaching. This book takes this as a given and provides practical help for teachers who wish to help their learners acquire intercultural competence in the ordinary classroom. It contains descriptions of lessons and materials from a wide range of classrooms in several countries and for beginners to advanced learners.
