Sommario/riassunto	Alternate physical layer (PHY) and necessary medium access control layer (MAC) enhancements to IEEE Std 802.22-2011 are specified in this amendment for operation in very high frequency/ultra-high frequency (VHF/UHF) television broadcast bands between 54 MHz and 862 MHz to support enhanced broadband services and monitoring applications. The amendment supports aggregate data rates greater than the maximum data rate supported by the IEEE Std 802.22-2011. This amendment defines new classes of IEEE 802.22(TM) devices to address these applications and supports more than 512 devices in a network. This amendment also specifies techniques to enhance communications among the devices and makes necessary amendments to the cognitive, security, and parameters and connection management clauses. This amendment supports mechanisms to enable coexistence with other IEEE 802(R) systems in the same band.

Sommario/riassunto	Originally published in 1984, this volume documents Bertrand Russell's travels in America covering the period 1945-1970. It is presented in two halves with the first a biographical account of Russell's involvement with the United States, with special reference to the seven visits he made there during this time period. Throughout this section the most representative of Russell's journalistic writings are highlighted and these are presented as full texts in the second half of the book. This collection is assembled to provide an understanding of Russell's deep and many-sided involvement
