Sommario/riassunto

This volume presents the results of many decades of research carried out by the Department of Theoretical Physics of the Belarusian State University, one of former USSR's prominent universities, providing a "snapshot" of the research activities of the department. With contributions from leading researchers who graduated from the department and now working in well known research centers around the world, this collection of works consists of selected mini-reviews of a wide variety of research topics on modern theoretical physics. It includes information on the methods and applications used in th

Sommario/riassunto

This comprehensive study of women anti-slavery campaigners fills a serious gap in abolitionist history. Covering all stages of the campaign, *Women Against Slavery* uses hitherto neglected sources to build up a vivid picture of the lives, words and actions of the women who were involved, and their distinctive contribution to the abolitionist movement. It looks at the way women's participation influenced the organisation, activities, policy and ideology of the campaign, and analyses the impact of female activism on women's own attitudes to their social roles, and their participation in p
