Crisis Containment and Resolution Policies for Selected Banking Crises; 5. Descriptive Statistics of Initial Conditions of Selected Banking Crises; 6. Descriptive Statistics of Crisis Policies of Selected Banking Crisis Episodes; 7. Selected Bank-Specific Guarantee Announcements; 8. Episodes with Losses Imposed on Depositors
Sommario/riassunto	This paper presents a new database on the timing of systemic banking crises and policy responses to resolve them. The database covers the universe of systemic banking crises for the period 1970-2007, with detailed data on crisis containment and resolution policies for 42 crisis episodes, and also includes data on the timing of currency crises and sovereign debt crises. The database extends and builds on the Caprio, Klingebiel, Laeven, and Noguera (2005) banking crisis database, and is the most complete and detailed database on banking crises to date.
