Livello bibliografico	Monografia
Note generali	"August 2009."
Nota di contenuto	Contents; I. Introduction; II. Outline of Theory; A. Characterizing the Distribution of Global Growth; Box; 1. The Two-Piece Normal Distribution; B. Constructing Confidence Intervals; III. Using Survey- and Market-Based Information; Figures; 1. Constructing Confidence Intervals; A. Survey-based Measures; B. Market-based Measures; IV. An Example: Forecasting Global Growth; A. Choice of Risk Factors; Tables; 1. Estimated Elasticities and Skewness Coefficients; B. Estimating the Weighting Parameters .; C. Constructing the Fan Chart; D. Interpreting the Results 2. Dispersion of Forecasts for GDP and Selected Risk FactorsV. Conclusions; 3. Fan Chart for Global Growth and Skewness of Risk Factors; 4. Fan Chart for Global Growth Based on Direct Estimates of Variance and Skew; References
Sommario/riassunto	This paper develops a simple procedure for incorporating market-based information into the construction of fan charts. Using the International Monetary Fund (IMF)'s global growth forecast as a working example, the paper goes through the theoretical and practical considerations of this new approach. The resulting spreadsheet, which implements the approach, is available upon request from the authors.
