

1. Record Nr.	UNINA9910965599503321
Titolo	Ecologically based pest management : new solutions for a new century // Committee on Pest and Pathogen Control Through Management of Biological Control Agents and Enhanced Cycles and Natural Processes, Board on Agriculture, National Research Council
Pubbl/distr/stampa	Washington, D.C., : National Academy Press, 1996
ISBN	9786612081224 9780309175784 030917578X 9781282081222 1282081225 9780309519854 0309519853 9780585002163 0585002169
Edizione	[1st ed.]
Descrizione fisica	1 online resource (xiii, 144 pages)
Disciplina	632/.96
Soggetti	Agricultural pests - Integrated control Agricultural pests - Integrated control - Environmental aspects Agricultural ecology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 117-132) and index.
Nota di contenuto	""Front Matter""; ""Preface""; ""Contents""; ""Executive Summary""; "" 1 Lessons from the Past Provide Direction for the Future""; "" 2 Defining and Implementing Ecologically Based Pest Management""; "" 3 Accelerating Research and Development""; "" 4 Public Oversight of Ecologically Based Pest Management""; ""References""; ""About the Authors""; ""Index""
Sommario/riassunto	In light of the increasing danger to the environment and human health posed by chemical pesticides, and the apparent glee with which pests rush to become resistant to every new poison, a team of scientists and agriculturists advocates a pest management approach that promotes

both agricultural production and a balanced ecosystem by incorporating ecosystem processes, biological organisms, products, cultivars, and cultural controls. They emphasize the importance of creating an information base and the procedure for integrating the approach into mainstream agriculture. Annotation copyright by Book News, Inc., Portland, OR
