

1. Record Nr.	UNINA9910965761803321
Autore	Salimov Arif
Titolo	Tensor operations and their applications // Arif Salimov
Pubbl/distr/stampa	New York, : Nova Publishers, 2013
ISBN	1-62257-104-5
Edizione	[1st ed.]
Descrizione fisica	1 online resource (200 p.)
Collana	Mathematics research developments
Disciplina	515/.724
Soggetti	Tensor algebra
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	On operators applied to pure tensor fields -- Algebraic structures on manifolds -- Applications to the Norden geometry -- Applications to the theory of lifts.
Sommario/riassunto	The notion of derivation of tensor fields is one of the central concepts and tools of mathematics. The author believes that differential geometric applications of tensor operators is a very fruitful research domain and provides many new problems in the study of modern differential geometry. This book is intended to provide a systematic introduction to the theory of tensor operators. This book is suitable for researchers, and will complement the Mathematics Research Developments Series, which will focus on research-level monographs. This book will also serve as a useful classroom resource for graduate students as well as final year undergraduate students on geometry, algebra, topology and physics.
