Sommario/riassunto	At the request of the U.S. Department of Education, the National Research Council's (NRC) Board on Testing and Assessment (BOTA) convened a workshop on reporting test results for individuals who receive accommodations during large-scale assessments. The workshop brought together representatives from state assessment offices, individuals familiar with testing students with disabilities and English-language learners, and measurement experts to discuss the

policy, measurement, and score use considerations associated with testing students with special needs.
