Sommario/riassunto	As Europeans began to move into the Atlantic in the late fifteenth century, first encountering islands and then two continents across the sea, they initiated a process that revolutionized the lives of people everywhere. American foods enriched their diets. Furs, precious metals, dyes, and many other products underwrote new luxury trades, and tobacco became the first consumer craze as the price plummeted with ever-enlarging production. Much of the technology that made new initiatives, such as sailing out of sight of land, possibly drew on Asian

advances that came into Europe through North Africa
