

1. Record Nr.	UNINA9910966205303321
Autore	Mistiaen Wilhelm Peter
Titolo	Degenerative aortic valve disease : its mechanism on progression, its effect on the left ventricle and the postoperative results // authored by Wilhelm Peter Mistiaen
Pubbl/distr/stampa	Sharjah, United Arab Emirates ; ; Oak Park, Ill., : Bentham Science Publishers, [2013?]
ISBN	9781608052875 1608052877
Edizione	[1st ed.]
Descrizione fisica	1 online resource (332 p.)
Altri autori (Persone)	MistiaenWilhelm Peter
Disciplina	616.125
Soggetti	Aortic valve - Diseases
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Tilte; EUL; Contents; Foreword; Preface; Abbreviations; Chapter 01; Chapter 02; Chapter 03; Chapter 04; Chapter 05; Chapter 06; Chapter 07; Chapter 08; Chapter 09; Chapter 10; Chapter 11; Chapter 12; Index
Sommario/riassunto	Degenerative aortic valve disease is the most prominent cardiac valve disease in Western societies. This volume describes some of the more important issues and problems for this condition: its progressive character and the underlying mechanisms of this progression diagnostic difficulties 1) ascertainment of valvular origin of symptoms in elderly; 2) the challenge of the low output - low gradient syndrome; 3) moderate aortic valve calcification during CABG; 4) prediction of the rate of progression (who will need surgery on short term and who not).
