Sommario/riassunto	Every business and organization today needs to impress stakeholders with its ethics policy. Universities, Ethics and Professions examines how

this emphasis on ethics by the professional world is impacting universities, institutions that have long been key contributors to ethical reflection and debate, and shapers of ethical discourse. Changing objectives, globalization, and public concerns continue to bring professionalism, and commercialization, into the dialogue about what ethics mean on campus. Universities, Ethics and Professions offers an in-depth examination of these issues.
