Sommario/riassunto

Human cloning is a main focus of current bioethical discussion. Involving the self-understanding of the human species, it has become one of the most debated topics in biomedical ethics, not only on the national, but also on the international level. This book brings together articles by bioethicists from several countries who address questions of human cloning within the context of different cultural, religious and regional settings against the background of globalizing biotechnology. It explores on a cross-cultural level the problems and opportunities of global bioethics.

Sommario/riassunto	The purpose of this book is to explain, first, what happens when we become too involved in our work, and, second, how we avoid being controlled by our work and how we prevent family members, friends,

colleagues, or employees from being so. In addition, it is hoped that the book will help bring about a debate about our work habits and initiate thought and discussion about our values and how much space work should be allowed to take up in our lives. The book is addressed to everyone who deals with the psychological working environment, among them business managers and counsellors who treat peopl
