

1. Record Nr.	UNINA9910966296903321
Titolo	Diet, nutrition, and cancer : directions for research // Committee on Diet, Nutrition, and Cancer, Commission on Life Sciences, National Research Council
Pubbl/distr/stampa	Washington, D.C., : National Academy Press, 1983
ISBN	9786610245802 9781280245800 1280245808 9780309566865 030956686X 9780585144719 0585144710
Edizione	[1st ed.]
Descrizione fisica	1 online resource (86 p.)
Disciplina	616.99/4052
Soggetti	Cancer - Nutritional aspects Carcinogenesis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliography.
Nota di contenuto	Diet, Nutrition, and Cancer: Directions for Research -- Copyright -- Preface -- Contents -- 1 Overview and Major Recommendations -- STRATEGIC OBJECTIVES AND PRIORITIES FOR RESEARCH -- 2 Approach to the Study -- 3 Diet and the Mechanisms of Carcinogenesis -- RESEARCH RECOMMENDATIONS. -- 4 Epidemiological Methods -- RESEARCH RECOMMENDATIONS -- Assessment of Dietary Exposures -- Types of Epidemiological Study -- Analysis of Data -- 5 Laboratory Methods -- METHODS FOR IDENTIFYING DIETARY INITIATORS AND MODIFIERS OF CARCINOGENESIS -- METHODS FOR ASSESSING THE EFFECTS OF NUTRIENTS ON CARCINOGENESIS. -- METHODS FOR IDENTIFYING MARKERS RELATED TO NEOPLASIA IN HUMANS -- RESEARCH RECOMMENDATIONS -- Initiators and Modifiers of Carcinogenesis -- The Effects of Nutrients on Carcinogenesis -- Markers Related to Neoplasia in Humans -- 6 Macroconstituents -- FATS -- PROTEIN. -- CARBOHYDRATES -- DIETARY FIBER -- ALCOHOL

-- TOTAL CALORIC INTAKE -- RESEARCH RECOMMENDATIONS --
General Recommendations for Epidemiological Research -- General
Recommendations for Laboratory Research -- Specific
Recommendations. -- Fat: Epidemiological Studies -- Fat: Laboratory
Studies -- Protein: Epidemiological Studies -- Protein: Laboratory
Studies -- Carbohydrates: Laboratory Studies -- Calories:
Epidemiological Studies -- Calories: Laboratory Studies -- Fiber:
Epidemiological Studies. -- Fiber: Laboratory Studies -- Alcohol:
Epidemiological Studies -- Alcohol: Laboratory Studies -- 7 Vitamins,
Minerals, and Nonnutritive Inhibitors of Carcinogenesis -- VITAMINS,
CAROTENES, AND RETINOIDS -- Vitamin A, Carotenes, and Retinoids --
Vitamin C (Ascorbic Acid) -- Vitamin E. -- SELENIUM AND OTHER
TRACE MINERALS -- Selenium -- Molybdenum, Zinc, Iron, Iodine, and
Arsenic -- NONNUTRITIVE INHIBITORS OF CARCINOGENESIS --
GENERAL RESEARCH RECOMMENDATIONS -- SPECIFIC RESEARCH
RECOMMENDATIONS.
Vitamin A and Carotenes -- Vitamin C (Ascorbic Acid). -- Vitamin E --
Selenium and Other Trace Elements -- Selenium -- Molybdenum, Zinc,
Iron, Iodine, and Arsenic -- Nonnutritive Inhibitors of Carcinogenesis
-- 8 Food Additives, Contaminants, Carcinogens, and Mutagens --
RESEARCH RECOMMENDATIONS -- 9 Consumer Behavior -- RESEARCH
RECOMMENDATIONS -- References -- Appendix A Committee on Diet,
Nutrition, and Cancer-Affiliations and Major Research Interests --
CHAIRMAN -- VICE CHAIRMAN -- MEMBERS -- ADVISOR -- NATIONAL
RESEARCH COUNCIL STAFF -- Appendix B Acknowledgments.
