Sommario/riassunto

Learn how to better clinically serve ?risky? adolescents?from the clients themselves!Clinical and Research Uses of an Adolescent Mental Health Intake Questionnaire: What Kids Need to Talk About explores the research on adolescent behavior culled from the answers to a clinician-designed intake questionnaire given to adolescent clients asking how they view their own risks, what they worry about, and what they wish to talk about. Respected authorities discuss the enlightening findings and present ways to reshape services, taking into account customer preference, risk and worry, and yo
